

Combined monitoring and forecast for a sustainable management of water resources and timely adaptation to drought

Tecnologia, Ambiente e Governance. Sfide Globali tra Data Center e Intelligenza Artificiale
29 October 2025

Venue
Centro Studi Americanistici "Circolo Amerindiano" (CSACA), Perugia (Italy)

October 29, afternoon

On October 29th, 2025, Professor Carla Piffer, PhD candidate Luana Abrahão Francisco, and PhD Jaine Cristina Suzin delivered presentations at the Centro Studi Americanistici “Circolo Amerindiano” (CSACA), addressing the theme “Tecnologia, ambiente e governance. Sfide globali tra data center e intelligenza artificiale”.

The event took place at the CSACA headquarters, located in the historic center of Perugia (Italy), and was attended by the center’s affiliated researchers as well as those coordinating its scientific and cultural activities.

This event was part of the Water4All Project, funded in Brazil by FAPESC (Public Call 12/2022 – FAPESC ABROAD), coordinated by Professor Carla Piffer, and integrated into the Joint International Research Program between PPCJ/UNIVALI and the Department of Law of the University of Perugia.
